

GET ENGAGED AME BOSTON 2017 INTERNATIONAL CONFERENCE OCTOBER 9-13

THE POWER OF THE LARGE GROUP EXPERIENCE

Companies that send large groups of associates to our conference find that one of the greatest benefits their organizations receive is a huge new capacity for action that has a dramatic impact on their culture.

The conference inspires leadership and builds a trusted, reliable resource on which team members can rely. The more people who experience the continuous improvement and lean knowledge that is presented, the more impact it has on a company's bottom line.

Large group participation dramatically accelerates a company's efforts in delivering value to the customer.

As you progress on your lean journey, you begin to realize that accelerating your continuous improvement efforts will require a strong collaborative effort from all levels of your organization.

An AME conference is focused on having members share, learn and grow their lean knowledge and continuous improvement methods.

Large groups provide the perfect forum for maximizing your organization's efforts to improve your processes and positively impact your culture. For example: A large collaborative effort at the conference often sparks more animated daily debrief meetings that help identify hidden barriers that are holding you back. Unleash your group's thinking and experience the power of lean, combined with the large group program, to dramatically grow your enterprise and deliver greater customer value.
