

THE JOURNEY TO ENTERPRISE EXCELLENCE STARTS HERE

The Association for Manufacturing Excellence (AME) is the premier organization for the exchange of knowledge in enterprise excellence. Our members come together to explore Lean thinking and other enterprise improvement methods, exchange best practices, and network in order to advance their careers and improve the competitiveness and overall value of their organizations.

Six Reasons Why Members Value AME

1. Relationships

The opportunity to develop new relationships and connect with those who are at the same stage of the excellence journey or to talk to those who have already been successful. You can learn from the best and find practical ways to apply creative ideas to your organization.

2. Motivation

Build, recapture, and rejuvenate your sense of purpose and commitment to the philosophies of Lean improvements. Membership in AME serves as a constant source of renewal while spurring new ideas and dialogue.

3. Knowledge and Skills

Expand the depth and breadth of your knowledge. Sharpen skills, intensify your understanding of Lean tools, and learn how to integrate industry practices into your organization. AME offers a host of educational opportunities that you can choose from to tailor just for you!

4. Benchmarking

Learn about the best-in-class practices, compare your experiences to the most successful, and make sure your continuous improvement efforts are on target. AME is the industry's largest repository of these techniques.

5. Workshops and Tours

Would you like to tour a plant that's had remarkable success? AME offers tours of industry leaders' facilities so that you can see what really works. We make sure that you get "hands-on" tools and skills. Last year alone, we offered more than 60 highly rated plant tours.

6. Presentations

The great depth and breadth of our presentations means that you will always find something relevant—an idea, a concept or a success story—that you can use. We showcase industry leaders who are articulate advocates for change and help you see how you can achieve the change you seek!

Today our profession requires increased productivity and specialized solutions. Turn to AME—a repository of highly productive industry practices with a membership of proven leaders—to find them. A world of answers awaits with your AME membership.
